Summary

AI Engineer at **CloudGO** shipping production AI across a CRM platform that serves **2,500+ Vietnamese enterprises** — lead scoring, customer segmentation, sentiment analysis on email & call transcripts, churn prediction, and 24/7 LLM chatbots.

Founder of **8 Sync Dev** — published researcher with 2 JTE papers, **1,368 combined downloads**, **13 citations**, cited at ACM UMAP 2025 [ref 19] and arXiv ReCatcher 2025 [ref 43] for AST-based code evaluation. Author of `ollama-docker-web-application` (**31★ / 15F**), a local LLM agent platform; **54★ across 50 public repos** under `@8syncdev`.

Experience

AI Engineer, CloudGO (CloudPro CRM) – Ho Chi Minh City, Vietnam Aug 2025 – present

- Own AI feature delivery across the CloudPro CRM product surface used by **2,500+ businesses** — lead scoring, customer segmentation, sentiment analysis on email & call transcripts, churn prediction, revenue forecasting.
- Designed and integrated an **LLM-powered 24/7 AI chatbot** into the customer-service module, cutting first-response time and offloading FAQ volume from agents.
- Built **retrieval-augmented (RAG) pipelines** wiring CRM data (PostgreSQL) into LLMs for personalized recommendations and next-best-action suggestions.
- Productionized AI components across integrations with **Zalo, Facebook, call-center (tổng đài), WMS, POS, ERP, HRM, TMS, DMS, Email Automation, and Ecom** channels.
- Contributed to the **AI Camera pipeline** — masked-face recognition at **99% accuracy in <1 s** for the on-prem CloudPro CRM + AI Camera offering.

Founder & Lead Developer, 8 Sync Dev – Ho Chi Minh City, Vietnam Jan 2024 – present

- Founder of the **8 Sync Dev** developer-education brand — operate 8syncdev.com, the [Dev8Sync](https://www.youtube.com/channel/UC8SyncDev) YouTube channel, and [@8syncdev](https://www.tiktok.com/@8syncdev) on TikTok (Next.js + Django + PyTorch), concurrently with CloudGO.
- Maintain **60 public repositories** with **177 followers** and **54 aggregate stars / 34 forks** across 50 non-fork projects on GitHub `@8syncdev`.
- Shipped **ollama-docker-web-application** — a one-command local LLM agent platform (Ollama + Docker + web UI) — **31★ / 15F**.
- Architected **ELP-CMP**, an enterprise e-learning platform with microservices in Next.js 15, FastAPI, PostgreSQL, MongoDB, and Redis; real-time sentiment analytics and AST-based code grading bundled in.

Senior Programming Instructor & Platform Developer, Fullhousedev – Ho Chi Minh City, Vietnam Sept 2021 – June 2025

- Trained **1,000+ students** across Python, Web, AI/ML, and Software Engineering tracks; ran small-cohort, project-driven curricula.
- Built and maintained fullhousedev.vn on Next.js + TypeScript, including the learning portal and instructor dashboards.

Software Developer, Minh Khang Mechatronics (MKC) – Vietnam Jan 2023 – Jan 2024

- Built industrial-automation software (HMI + real-time control loops) with **99.9% uptime** across production shifts.
- Integrated PLC / sensor telemetry into operator-facing tooling for mechatronics product lines.

Publications

Sentiment Prediction Based on Deep Learning for Intelligent E-Learning Systems 2025

RoBERTa-based sentiment model for adaptive feedback in e-learning systems. **269** OJS downloads. Lead author; advisor: Assoc. Prof. Van-Dung Hoang.

Nguyen, Anh-Tu Phuong, Duong, Duc-Khai, Hoang, Van-Dung

[10.54644/jte.2025.1661](#) (Journal of Technical Education Science (JTE))

Development of Code Evaluation System based on Abstract Syntax Tree 2024

AST-based static + semantic grader for programming-education workflows. **1,099** OJS downloads, **13** Semantic Scholar citations (5 OpenCitations). Adopted in production: **ACM UMAP 2025** [ref 19, p.2] cites it for "ASTs widely used in automated code analysis"; **arXiv ReCatcher 2025** [ref 43, p.7] cites it as a canonical AST grader in educational settings. Full per-citation excerpts in `data/research.md`.

Nguyen, Anh-Tu Phuong, Hoang, Van-Dung

[10.54644/jte.2024.1514](#) (Journal of Technical Education Science (JTE))

Projects

ELP-CMP E-Learning Platform 2024 – present

Microservices e-learning platform — Next.js 15 + FastAPI + PostgreSQL + MongoDB + Redis, with AST-based code grading and real-time sentiment analytics for student-facing feedback.

- Designed the AST-grading service that backs the JTE 2024 paper (1,099 downloads · 13 citations).
- Built RAG-powered tutor module on top of OpenAI / Qwen / Ollama with pgvector retrieval over course materials.

ollama-docker-web-application 2024 – present

Local LLM agent platform — Ollama + Docker + web UI, ready-to-run for self-hosted models. **31★ / 15F**.

- One-command `docker compose` stack bundling Ollama runtime, vector store, and a web chat interface.
- Reference implementation for the 8 Sync Dev RAG curriculum.

Education

Ho Chi Minh City University of Technology and Education (HCMUTE), BS in Information Technology – Ho Chi Minh City, Vietnam Sept 2021 – June 2025

Graduated with **Distinction**, GPA **3.3 / 4.0**. Undergraduate research produced two peer-reviewed publications in the *Journal of Technical Education Science* (see Publications); advisor: Assoc. Prof. Van-Dung Hoang.

- Thesis: AST-based Code Evaluation System and RoBERTa Sentiment Pipeline for E-Learning (ORCID 0009-0005-9352-9353)

Skills

Languages: Python (Expert), TypeScript / JavaScript (Expert), SQL, C++ , HTML / CSS

AI / ML: LLM integration (OpenAI, Qwen, Ollama), LangChain / LangGraph, RAG, vector DBs (pgvector, Qdrant), fine-tuning, RoBERTa / BERT, NLP, PyTorch, TensorFlow, AST analysis

Backend: FastAPI, Django, Flask, Node.js, Encore.ts, microservices, gRPC, REST, WebSockets

Frontend: Next.js 15 / 16, React 19, TypeScript, Tailwind, shadcn/ui

Data & Infra: PostgreSQL, MongoDB, Redis, Docker, AWS, CI/CD, Git, Linux

Domains: CRM AI, sentiment analysis, lead scoring, churn prediction, code analysis, e-learning
